DOCUMENT NO.: 7710-023-IN-BRWL

Dear Mr. Dadio:

CDM Federal Programs Corporation (CDM) collected tap water samples at your property, as well as in the surrounding area, on August 23, 1994. The U.S. Environmental Protection Agency (EPA) analyzed the water samples for volatile organic compounds and inorganic analytes (metals and cyanide).

Enclosed for your information are the analytical results. The groundwater test results from your well are listed under GW-01 and GW-02. One volatile organic compound was detected (chloroform) and six inorganic analytes were detected (barium, calcium, magnesium, potassium, sodium, and zinc). Federal maximum contaminant levels (MCLs) for public water supplies, as regulated under the Safe Drinking Water Act, were not exceeded. For your reference, I have attached a copy of the MCLs.
